## *The Person I Like the Most*

When I was just a little child I began to see  
I have a special family  
Who is always there for me. And among them is a  
Person, who laughs with me,  
who cries with me  
and I call him “NANA”.

‘Nana’ my friend my hero, My Saviour from all the odds.  
Nana means “Happiness” around. He is the pillar of my first dream.  
He always gives wings to my thought Higher and higher with all  
Good values and manners.

N ➡ Negativity out

A ➡ Ability In

N ➡ Nervousness out

A ➡ Awareness In.

When I was just a little child I began to see  
Nana is my grandfather less and a friend more.

The one who understands me like a kid, guides me like a teacher,  
Consoles me like a mother and protects me like a father.

He is a complete family in one.

Roof to my maternal home and Backbone for us. He is there, so we are  
safe and happy.

I love u "NANA ji".

*Atharv Sengar*

*Class: 3H*

## *My Candyland Dream*

In Candyland, a place so sweet,  
With chocolate ground and a red candy treat.  
Gummy bears bounced up and down,  
Lollipop trees grow all around.  
I met a bunny named Fluffy  
With a magic stick that was shiny.  
We walked through sticky caramel caves,  
And climbed candy hills where birds play.  
A nice chocolate dragon came,  
And took us flying in a fun game.  
We flew over a big candy sea,  
To Cupcake Island, just Fluffy and me.  
Under candy stars, we sat to eat,  
With yummy marshmallow pizza, so sweet.  
In Candyland, my dream came true,  
This adventure was so much fun, too.

*Muhammed Zishan*

*Class: 3J*

# *My Winter Vacation*

Here I was about to begin with my winter vacation,  
But we were yet to decide on the final location.  
Then I noticed my parents discussing in isolation,  
Little did I know they were about to blow my mind in admiration.  
The suspense was broken to me  
Before I would throw up a fuss.  
I was informed without further bewilderments & it was a complete  
astonishment Europe was the picked destination.

The teeny girl in me had wings blooming,  
As I could only thank God to see my dream blossoming.  
Spain, Portugal, France & Switzerland was the planned route map.  
I was set to explore the countries without even sparing time for a nap.  
We packed our bags & were out on my dream flight,  
And spent 10 memorable days that I now write.  
Lisbon displaying its cultural pride,  
Barcelona's heritage for which their martyrs died,  
Paris beaming in its gleaming lights,  
Swiss Alps & its mesmerizing beauty at heights.

*Richelle Ranjith*

*Class: 3K*

## *The Person I Like the Most*

When I sat down to write,  
About the person whom I like  
She was the first to come to my mind.  
Humble, generous, loving and kind.  
Pleasant and soft as a feather,  
She is none other than my mother.  
She cooks and serves delicious treats,  
My dinner plate looks like a huge feast.  
To her, I run for everything  
Perhaps she solves it all in a quick time of thinking,  
She helps and guides me in my studies  
Then, we play together as warm buddies.  
When I feel sad and lost  
She livens up my mood in a blast.  
I trust her with all my heart,  
And she believes in me with all her mind.  
Her love has no words to measure,  
She is my greatest treasure.

*Tanvisha Esther Israel Kishore*

*Class: 3M*

## *Dawn*

Morning light shines through my windows,  
As I wait for the day to dawn.  
Cheerful memories of yesterday,  
Fill my heart at the break of day.

I smile as my day begins,  
As fresh as the dew.  
The sunlight slowly shines through my windows.  
My day surely starts perfect.

I take a deep breath and smell the morning scent.  
It gives me joy in the morning.  
The day waits with chances and challenges.  
I welcome such things to make my life joyful and cheerful.

*Jacob Geo Mathew*

*Class: 3N*

# *A Day to Remember*

A day to remember, a day so bright,  
In our classroom, filled with laughter and light.  
We shared stories, jokes, and smiles so wide,  
Our bond grew stronger, our hearts full of pride.

Our teacher guided us with a gentle hand,  
As we explored new worlds, and knowledge to stand.  
We discovered, created, and learned with glee,  
Together, a family, wild and free.

That day was special, a treasure to keep,  
A memory to cherish, a moment to reap.  
For in that classroom, we found our place,  
Where friendship and joy lit up our face.

So here's to that day, a day so divine,  
A memory to hold close, a heart that's mine.  
For in that class, we found our way,  
And made a memory that will never fade away.

*Safiya Sabirali Khatib*

*Class: 3P*

## *Friends*

In the world full of good and evil,  
Where people are angels and devils;  
I found a perfect person,  
Who knew what meant by one and one.  
'It is eleven which means unity', he said,  
And on the path of joy and fun was our friendship laid.

He is an epitome of love and care,  
His ways are just and fair,  
He is daring and has no fear,  
He talks to the point and is always clear.  
He is a part of my life and is my bestie,  
My friend is just funny and naughty.

*Mohammad Hamza Anwar*

*Class: 3Q*

# *My Hobby*

I love to learn about countries far and wide,  
And languages spoken, with different pride.  
I learn about flags, and capitals too,  
And say "hello" in languages, old and new.

I say "Bonjour" in French, with a smile so bright,  
And "Hola" in Spanish, with a warm delight.  
I learn "Konnichiwa" in Japanese, with a bow so fine,  
And "Namaste" in Hindi, with hands so divine.

I visit China, with its Great Wall high,  
And learn "Ni hao" in Mandarin, as I fly by.  
I go to India, with its spicy food,  
And learn "Dhanyavad" in Hindi, as I feel so good.

Learning about countries, and languages too,  
Is my favorite hobby, it's fun to do!  
It takes me on adventures, to new lands and places,  
And helps me make friends, with smiling faces!

*Mohamed Faud Al Yousef*

*Class: 4B*

## *Nica – My Lovely Pet*

Nica my tiny cat,  
With fur that's soft and grey,  
She likes to nap on cozy mats,  
And in the sun she'll lay.

She's quiet as a gentle breeze,  
Her paws tiptoe around,  
But when she spies a bird or leaf,  
She leaps without a sound.

Her eyes are big and bright as stars,  
They sparkle in the night,  
She chases shadows, near and far,  
With all her kitten might.

Nica loves to snuggle close,  
Her purrs are sweet and low,  
She's the best little friend to have,  
And that's something we all know.

So here's to Nica, our grey cat,  
She's clever, kind, and true,  
With Nica by our side each day,  
The skies are always blue.

*Dakshina.S*

*Class: 4C*

# *The Person I like the Most*

My dad is strong, my dad is kind,  
Always there with love so fine.  
With a smile that warms my heart,  
He was there for me right from the start.

Working hard to make things right,  
His hugs are warm, his words so bright.  
Teaching me to be brave and true, I am thankful for all that you do.

With a smile that brightens each day,  
He guides me along life's winding way.  
Teaching me with patience and care,  
His wisdom and kindness are a gift so rare.

His laughter fills our home with cheer, His hugs wipe away any fear.  
A hero to me, in every way,  
I cherish him more with each passing day.

When I need him, he's always near,  
To comfort me, to calm my fear.  
His wisdom guides me, strong and wise,  
In his presence, my spirit flies.

Dad, you are my strength, my guiding light,  
In your arms, everything feels right.  
Thank you for everything that you do,  
I am grateful and blessed to have you.

*Kamalika Manikandan*

*Class: 4E*

## *Let's recycle*

Look around,  
There's so much plastic,  
Let's recycle,  
It's fantastic.

Don't forget,  
About paper and glass,  
Recycle together,  
With your entire class.

We'll make sure,  
We never litter,  
Let's recycle,  
We are not quitters.

When we place our garbage,  
In the right bin,  
Both we and nature,  
Will surely win.

Thanks for keeping the environment,  
Healthy and clean,  
Recycling is fun.  
Let's make the earth green

*Aisha Qumar*

*Class: 4F*

# *I Love the Rain More And More*

In the comfort of my house,  
I see nature's wonders never cease.  
I enjoy walking in my garden,  
And see how nature unfolds.

The air is soon filled with earthy scent,  
A kind gift that God sends.  
I breathe in deep and slow,  
Happily seeing the dark clouds as they grow.

Rain begins its gentle dance,  
As droplets kiss the thirsty earth.  
I sit and watch the garden grow,  
Each leaf, grass blade and petal are in the flow.

I wish it rains and rains, more and more,  
And I won't complain if it rains more.  
Each splash makes my spirit soar,  
I love the rain, more and more.

*Flavia Lucy David*

*Class: 4G*

## *I Love to Sing*

I love to sing, it's so much fun,  
When I sing, my heart is won.  
I belt out tunes, loud and clear,  
My favorite hobby, I hold dear.

I sing in the shower, I sing in the park,  
I even sing in the dark.  
I sing with friends, I sing with glee,  
Singing makes me happy, you see.

When I sing, I feel so free,  
My voice is like a happy breeze.  
I sing of joy, love, and fun,  
My favorite thing, I've just begun.

So come along, give a cheer,  
Let's sing together, year by year.  
We'll sing our hearts out, loud and bright,  
With joy and happiness, day and night!

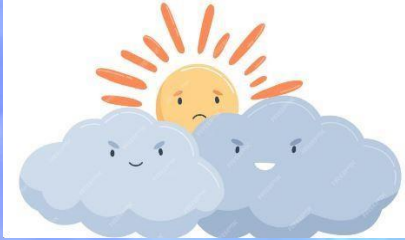

*Dharwin Raj Anton Kanna Perumal*

*Class: 4J*

# *The Journey of Rain*

It comes from the sky  
It goes to the earth

Its income is tiny as droplets  
Its outcome is plenty as flood

It accompanies sound and light  
It leaves water everywhere

It hides the sun  
It exposes the rainbow

It keeps us inside our home  
It takes us outside with an umbrella

It makes us happy and cool  
It makes us sad when there's disaster

Finally, it is essential for our existence!!

*Norah Aleya Joby*

*Class: 4P*

# *The person I like the most*

## **Paappa – My hero**

With your kindness and cheer, you light up the day, Turning darkness into light along the way.

I'm glad to have you close to me,  
In every adventure and game, we play,  
You make the world a fun place to stay.

When we're together, time flies by fast,  
Each moment with you is a memory to last.  
You're my favorite person, so happy and true,  
You are my anchor, my guiding star.  
I'm so glad to have you in my life!

When the sun comes up and the day is new,  
I'm so happy to think of you.  
Your smile and laugh make me feel so bright,  
Playing and laughing with you is so fun,  
You turn every day into pure delight.

You make each day shine like the sun.  
Papa, My hero, You're my favorite person.

*Class: 4Q*

# *Stories*

## *My Hobby*

My hobby is origami. Origami is a type of craft done by folding paper into different shapes or things. It does not require cutting with scissors. Some of it is very hard, but the results are worth it.

I started origami when I was four. I started with simple things like boats and aeroplanes. Now, I can make complex things like a Frisbee, batarang, dragons, and birds.

I always make origami for my friends. They always ask me for ninja stars. It makes me happy to do it. My specialty is different kinds of bats (the animal). Okay, now I need to go and find paper to make something new.

*Class: 3A*

# *The most memorable day of my previous class*

My name is Nandan Teja Kancherla, I am studying in FAIPS DPS, 3B. I am going to share my most memorable day of my previous class 2B. Drawing is my hobby, so I got an opportunity to participate in the Guinness book of world records for Micro Art. I went for training under our Art Teacher and learned Micro Art for 2 months. Then on 22nd May, 2023 an event took place in our school where a total of 58 students participated from different nationalities and classes. I was smaller than all who performed. I drew Kuwait Towers and Kuwait Liberation Tower in micro art along with my elder brother Rutvik Kancherla who is in 7th class. We got selected for the Guinness Book of World Record and we got our certificate presentation in FAIPS-DPS new auditorium. Our event was the first event in the new auditorium. I was very happy to be a part of this big event. This was my most memorable day.

*Nandan Teja Kancherla*

*Class: 3B*

## *The most memorable day of my previous class*

Life is full of memories, events, moments and experiences. Some memories in life are good and some are bad. Everyone has a special memory that they will never forget.

The most memorable day in my life was my last day of previous class. We had lot of fun. There were no rules and regulations in the class that day. We shared food with each other and played many games. My ma'am gave us the performance card which was based on our whole year's performance, discipline as well as talent in many different fields. I was the luckiest one to get all stars on it. When teacher announced my name I was overwhelmed with joy, as I had worked hard the whole year to achieve those stars on it. Our teacher gave gifts to the whole class. She told us to stay healthy and not to trouble the next grade teacher. After this, we had little music and entertainment. Some of us sang songs. We also played some indoor games.

I took autograph from my ma'am as she is one of my favorite teachers. I miss her a lot. During break whenever I get time I rush to meet her. She will always hold a special place in my heart.

*Inaaya Shaik*

*Class: 3E*

# *My Hobby*

"Happy is a man living by his hobby" Everybody has a hobby. A hobby represents a person's behavior and skills. Hobbies bring people together. My hobby is solving Rubik's Cubes. Some even change shape, they are called shapeshifters. My brother helps me solve these shapeshifters. I started to solve a Rubik's Cube when I was 4 years old. After 2 years I participated in a Rubik's Cube competition.

Unfortunately, I lost in round 2. But since then, I am trying to solve it faster. Other times I try to solve different Rubik's Cubes and try to master them. Now, I am writing the history of Rubik's Cubes. In 1974, Erno Rubik a Hungarian inventor made a wooden 3x3x3 cube to teach physics. He called it the Magic Cube. But in 1980 it was renamed the Rubik's cube in honor of him. It later started to become a global sensation with the first international championship held in 1982. Now over 350 million cubes have been sold. Making it one of the most famous puzzles in the world, from a teaching tool to a worldwide phenomenon. It helps children in fast and technical thinking.

# *My Visit to Iceland*

Hello everyone, my name is Om Pawan Shewale. I am from class 3-M in FAIPS DPS school.

This year during my summer vacation I visited a wonderful country called Iceland with my family. Iceland is an island since it is surrounded by water on all sides. It is also known as 'The Land of Fire and Ice. The weather in Iceland is freezing compared to Kuwait even in June. We started our hop-on hop-off bus tour from the city centre. On this tour, the main attraction for me was the Whale Museum where we saw lots of life-sized Whale models. In the Whale Museum giftshop, I bought a stuffed Puffin and called him Puffy. I also ate delicious fish and chips.

The next day we visited the Lava Tunnel formed after a volcanic eruption a few hundred years ago. I also visited the most beautiful waterfalls in Iceland where I was lucky to witness 2 rainbows at one time. Next, we visited Vatnajökull, the largest glacier in Iceland, it was a sight to behold.

How can I forget the beaches of Iceland? Almost all beaches have black sand. The black sand beach and the diamond beach are so uniquely different with glacier pieces drifting along the waves at the beach. I even spotted a few seals at the beach. When we visited the highlands, I even got a chance to play with snow. I finally made a snowman with my hands.

Iceland is also home to many beautiful birds. I will never forget visiting the Puffin colony and watching these beautiful birds from a close distance. The North Atlantic Ocean surrounds Iceland and is home to different whale species. On our whale watching tour, it was a treat to watch minke whales and humpback whales in their natural habitat.

We had an opportunity to visit the Icelandic horses which are unique to the rest of the horses in the world as they have five gaits. I will never forget the experience of petting a horse of my age. Iceland is known for its Geothermal springs and I tasted a Geothermally baked rye bread.

I had such a memorable time in Iceland I didn't want to leave. These fascinating memories of visiting whales, seals, volcano fields, geothermal springs, hiking glaciers, Icelandic horses, beautiful waterfalls, Puffins, black sand beaches, moss-covered landscapes and lava tunnels will always stay with me.

*Om Pawan Shewale*

*Class: 3M*

## *The Person I like the most*

The person I admire most is Dr. APJ Abdul Kalam, a renowned scientist and the 11th President of India. His life story, from a newspaper boy in Rameswaram to the Missile Man of India, is incredibly inspiring. Dr. Kalam played a pivotal role in India's Pokhran-II nuclear tests in 1998, which put India on the map of major nuclear countries. He was not only a brilliant scientist but also a passionate teacher and a visionary leader. His dedication to education and inspiring young minds has always motivated me to pursue my academic goals with perseverance and passion.

Among the many inspiring figures in India, I deeply admire Dr. APJ Abdul Kalam for his monumental contributions to science and education. Born into a modest family, his journey to becoming India's 'Missile Man' is a testament to the power of determination and hard work. Dr. Kalam's role was crucial in developing the Agni and Prithvi missiles, significantly advancing India's defense capabilities.

Beyond his scientific achievements, what resonates with me the most is his dedication to teaching and motivating the youth. His book, "Wings of Fire," provides a roadmap for achieving dreams through perseverance and hard work, emphasizing the importance of education. Dr. Kalam's life teaches us to dream big and work tirelessly towards achieving those dreams, making him a perpetual source of inspiration for students like me.

*Ansh Kanani*

*Class: 3R*

## *The Witty Kid*

Today, Kadim was very happy and why shouldn't he have been? It was his birthday. He was excited to go to school and celebrate with his friends. Kadim came from a poor family, but his parents had managed to buy him a new shirt for his birthday. Kadim was grateful to his parents for their loving gesture. He happily wore his new shirt and took his bicycle to ride to school, which was at the other end of the village. On the way, his bicycle broke down. So he started walking. While walking, he didn't notice a muddy puddle and accidentally fell into it, soiling his new shirt. Kadim felt terrible about ruining his new shirt and was about to cry. Just then he realized that crying wouldn't solve the problem. He decided to use his wit. There was a river nearby, so he went to the river and washed his shirt. Since it was a sunny day, his shirt dried quickly. Meanwhile he also repaired his bicycle and made it to school. Although he was a bit late, he happily enjoyed the rest of his day.

**Moral:** There is always a solution to a problem. We just need to stay calm and look for a way out of the trouble.

*Aehan Fazal*

*Class: 3D*

## *Save Our Environment, Save Our Lives*

Did you ever think of losing everything what you have, at the wink of an eye? By everything I mean to say, your parents, friends, neighbours, houses, relatives, school, books, toys, dress, land etc.

This write up is all about the people of Wayanad, a rural district in Kerala. Wayanad is a beautiful hill station where we used to go for staycations to enjoy wildlife, fog, nature etc.

Now it is a graveyard due to the natural calamity. It was a casual night where all slept peacefully with their families dreaming a pleasant morning. Unfortunately, after the midnight heavy rain followed by a landslide washed away the entire village and the villagers along with their dreams. Hundreds of people had died; remaining population lost their loved ones and their property. Many kids became orphans. This disaster wiped out an entire area from the map.

This point I started thinking how lucky we are to get a chance to live one more day/one more month/ one more year, on this beautiful earth. Have you ever thought about the reasons of such natural disasters? The global warming has got a serious impact on the weather and climate of a place. We have learned the importance of protecting our earth, during our science classes. If we harm the nature, it will certainly harm us back. So, we should take all the possible measures to protect our environment to save our earth and lives.

*Devadath Ashokkumar*

*Class: 4K*

# *The Dream About My School*

One night, I had a hilarious dream about my school. It wasn't a regular school day. In my dream, my school turned into an amazing place full of adventure! When I walked inside, everything was magical. The corridors had giant bookshelves with glowing books. The usual classrooms had turned into magical rooms.

First, I went into the Computer Lab, which was now a spaceship! My friends and I became astronauts, and our teacher was the captain. We explored colorful planets and met friendly aliens who showed us how to float in space.

Next, the Art Room became a magical garden. We painted pictures that came to life. My friend painted a butterfly, and it flew off the paper!

In the Library, a door opened and led us to a fairy tale kingdom where we played with friendly and beautiful fairies. We had a great time.

The most amazing part was the Playground which turned into an adventure park with roller coasters and amazing water slides. We laughed and had the best time ever.

When the school bell rang, I was back in my regular classroom. But the magic of the dream stayed with me. I woke up feeling excited and happy. It reminded me that school can be full of surprises and learning can be an adventure every day.

Dreams like these help us imagine, explore, and have fun while learning.

*Jonah Isabel Jinoy*

*Class: 4L*

## *My Role Model*

Super humans. We read about them, watch them and admire them in the virtual world but I live with a superhuman. She is my mother.

Be it teaching children, she has been doing her part to make this world a better place to live.

My mother, is my role model. She inspires and motivates me to grow without any barriers. It seems to me that this woman looks at life as a challenge and wholeheartedly intends to seize the day every day.

My mother looks after me and supports me always. Right from childhood she has been with me like my shadow. It had been riddled with hurdles and difficulties, but she has managed to cross them all because of the amazing and independent person she is.

She not only helps me whenever I am in need, but she also teaches me to help myself. She taught me to keep myself neat and clean, how to eat and how to know how much to eat. She says, “a child does not learn from what parents say but from what parents do”.

Whenever, I look at my mother I see an ordinary person but when I think about what she does and how she does it, she becomes divine and the reason of my smile!

My mother has taught me that we can overcome hard times and that lost battles can be won. She has taught me more than I could have learnt from any book.

She sets an inspirational example, teaching me how to live life and make wise choices, even in the most uncertain situations.

I respect her a lot. She is my inspiration, my role model.

*Loredana Joseph*

*Class: 4L*

## *The Three Princesses*

Once upon a time in a royal kingdom, the king had three daughters- Holly, Linda and Daisy. Holly and Linda hated Daisy. The king often thought who would be his successor and decided to give his daughters a task. He called his daughters and told them that they should go to a poor, old man and give him some food to eat to which they agreed and set out together.

Holly and Linda went up to the poor old man and said, "You stink and don't deserve this food!" They then threw the food in the garbage. Daisy felt pity for the poor old man and she served the poor old man some food, kindly. All of them then returned to their palace.

The King asked his daughters if they gave the poor man food to which they all replied, "Yes". The poor old man then entered the palace. Holly and Linda said, "You again! Why are you here?". Then the poor old man said, "I am the King's friend and he asked me to act as a poor man to check your kindness". The king then asked his friend, who was the kindest among his daughters? The king's friend replied "Daisy". So the king finally came to a decision and Daisy became the queen.

*Gowri Ajith*

*Class: 4L*

# *My Hobby*

## **Playing Board Games!**

A hobby is an activity done regularly in one's free time for pleasure, personal satisfaction, and relaxation. When I was 4 years old, my father introduced me to modern board games, and we kept playing while I grow and now playing board games is my hobby.

When I say board games, many think of games like Monopoly, Risk, Ludo, Snakes & Ladders, etc., but they are purely luck based and boring, and after a few plays, we never enjoy playing them again.

Whereas games like Splendor, which my father started playing eight years ago, is played even today at our home and more importantly still enjoyable.

Modern board games offer so much more varied and thematic gameplay, interesting decision making and engaging social interaction.

Playing board games is helping me to learn many essential life skills, such as solving problems, thinking critically and creatively, setting goals, patience, perseverance, self-confidence, building healthy relationships, communicating effectively, social interactions, accepting failures, and learning from mistakes. The main reason I play board games is to spend more time with friends and family and staying away from screens.

A Quote from George Bernard Shaw "We don't stop playing because we grow old; we grow old because we stop playing."

Let us keep playing and stay young!

*Visagan Kumaran*

*Class: 4N*

## *The Dream I Remember*

In this dream, I found myself walking along a winding path surrounded by towering trees, their leaves shimmering in shades of emerald and gold. The air was fragrant with the scent of blooming flowers, and the soft rustle of leaves created a soothing melody. As I ventured deeper into the forest, I stumbled upon a serene lake, its surface reflecting the vibrant hues of the foliage above. The tranquility of the scene enveloped me, filling me with a sense of peace.

Suddenly, a gentle breeze rippled across the water, and to my astonishment, a group of ethereal fairies emerged. Their delicate wings sparkled like diamonds in the sunlight as they danced around me, laughter ringing like chimes in the air. One fairy approached, her eyes twinkling with mischief and wisdom. She whispered secrets about the forest—hidden paths and ancient tales waiting to be uncovered.

As I listened, I felt an overwhelming sense of belonging and connection to this magical realm. It was as if the forest was inviting me to explore not only its depths but also my own inner world. Just as I began to delve deeper into this enchanting experience, I was jolted awake, leaving me with a profound sense of wonder.

This dream serves as a reminder of the beauty and mystery that life holds. It encourages me to seek out adventure and embrace the unknown, both in dreams and reality.

*Class: 4R*

## *The person I Admire*

DR. APJ Abdul Kalam, a visionary and a true gem of India, was born on October 15, 1931, in Rameswaram Tamil Nādu. His journey from a humble background to becoming one of India's most respected scientists and leaders is an inspiration to all. Dr. Kalam's career in science and technology as illustrious. He played a key role in the development of Indian's space and missile programs earning him the title 'MISSILE MAN OF INDIA'. His work at ISRO and DRDO laid the foundation for India's advancements in aerospace technology. During his tenure, he continued to inspire the nation with his wisdom and vision for prosperous and developed India he was known for his accessibility to students and his commitment to education his books including "Wings of fire" and Ignited Minds", have motivated countless young minds to pursue their dreams relentlessly. Dr. Kalam's love for Education led to initiatives like the 'KALAM RAJU TABLET' aimed at providing quality education to remote areas on July 27 2015, India lost a great leader and beloved scientist when Dr. APJ Abdul Kalam passed away. However, his legacy as a role model, a symbol of knowledge, humility, and dedication to the betterment of society continues to influence and inspire people across the globe. HE is the person I like the most.

# *Recreational Vehicle*

A vehicle is recreated is called recreational vehicle. It's like a dream home on wheels. It has bed room, sofa, kitchen, and bathroom like our home. We can sleep, eat, and play inside it. These vehicles have lots of storage spaces.

The power generated in RV is by using solar panel, portable battery, inverter or charger. The Ac is mounted on the roof; it cools down the entire area. Also heater facilities are provided. There are different types of RV. Class A, Class B, Class c, fifth wheel trailers, caravans Etc.

They have wheels, so we can take them anywhere. We can go camping, visit grandparents or go on a road trip. Recreational vehicles make adventures more fun!

It's like a big toy that takes us on adventures!"

*Class: 4R*

## *My Wish*

I wish to go to Disneyland. I want to go there to live the life of cartoon characters one day and have lots of fun. First, I want to visit Sleeping Beauty's castle as she is my favorite princess. Then I want to visit the water park and have lots of fun splashing around with my family. Later, I want to visit Alice in Wonderland and explore all the weird and unusual things over there and finally the thing I want to visit the most is the Haunted Mansion. I have always been told by my sister how fun it is, and I want to try it for myself.

Now let me tell you some secrets you didn't know about Disneyland. Firstly, under the Magic Kingdom there are a series of tunnels called utilidors that are designed to maintain the magic for all guests and move cast members without being seen in the 'wrong' land in costume. Secondly, there are 1000 hidden Mickeys within Walt Disney's world resort. Thirdly, characters in Disneyland must hug guests until the guest decides that they've had enough magic. Fourthly, there is a secret guest only entrance which drops people off inside the grizzly peak near soaring around the world and grizzly river run. Finally, if you hang around the Magic Kingdom for an extra 15 minutes after the park officially closes, you will see what the Disney fans call the 'Kiss Goodnight' where Cinderella's castle lights up for the last time. That's the evening when 'Wish upon A Star' plays.

## *My Dream*

Since my childhood when everyone used to asked about my ambition I had only one reply u know what ....jai hind that means. I want to be in army or military. I have a question for you all what is meant by military in my word if I will say in my words that is do or die for my country...but I will never let my country down. Let me tell you all about short story about my army or military dream.

It was a usual “summer holiday” evening, mom used to take me to the local park for slides for some reason, she started telling me about her family, her extended family, and then something about mu maternal grandfather. I wasn’t honestly paying any attention till I heard “He was in the army as a doctor”. Rest of my holiday was spent asking about him each and every day, who was he, what was he like, what he studied, how he got into army and a non-stop list of such questions She answered patiently to everything she knew.

Inspiration comes when you are least expecting it in the simplest of things, but difficult to grasp, it makes you reconsider your views, makes you push your limitations, makes you kick open the closed doors and find, your very own hidden sanctuary behind it.

So, this is How My Dream Begins.

# *From Painter's Brush*

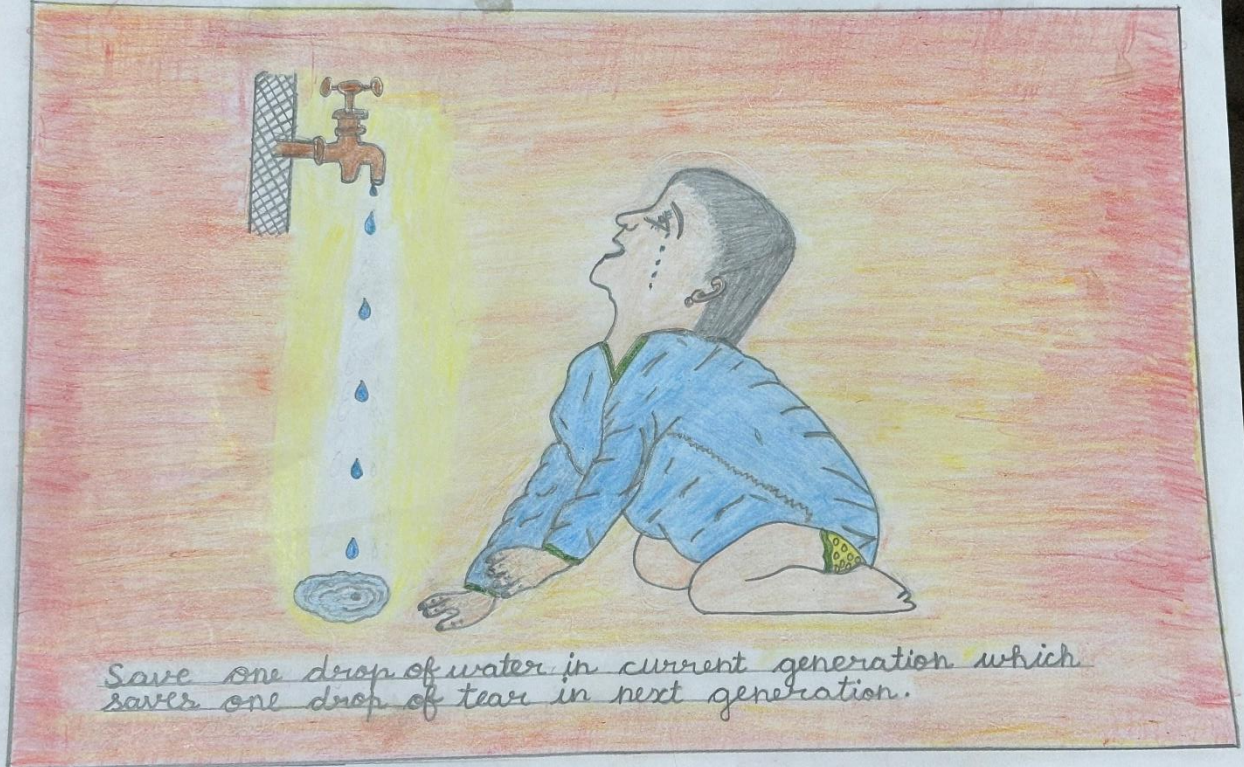

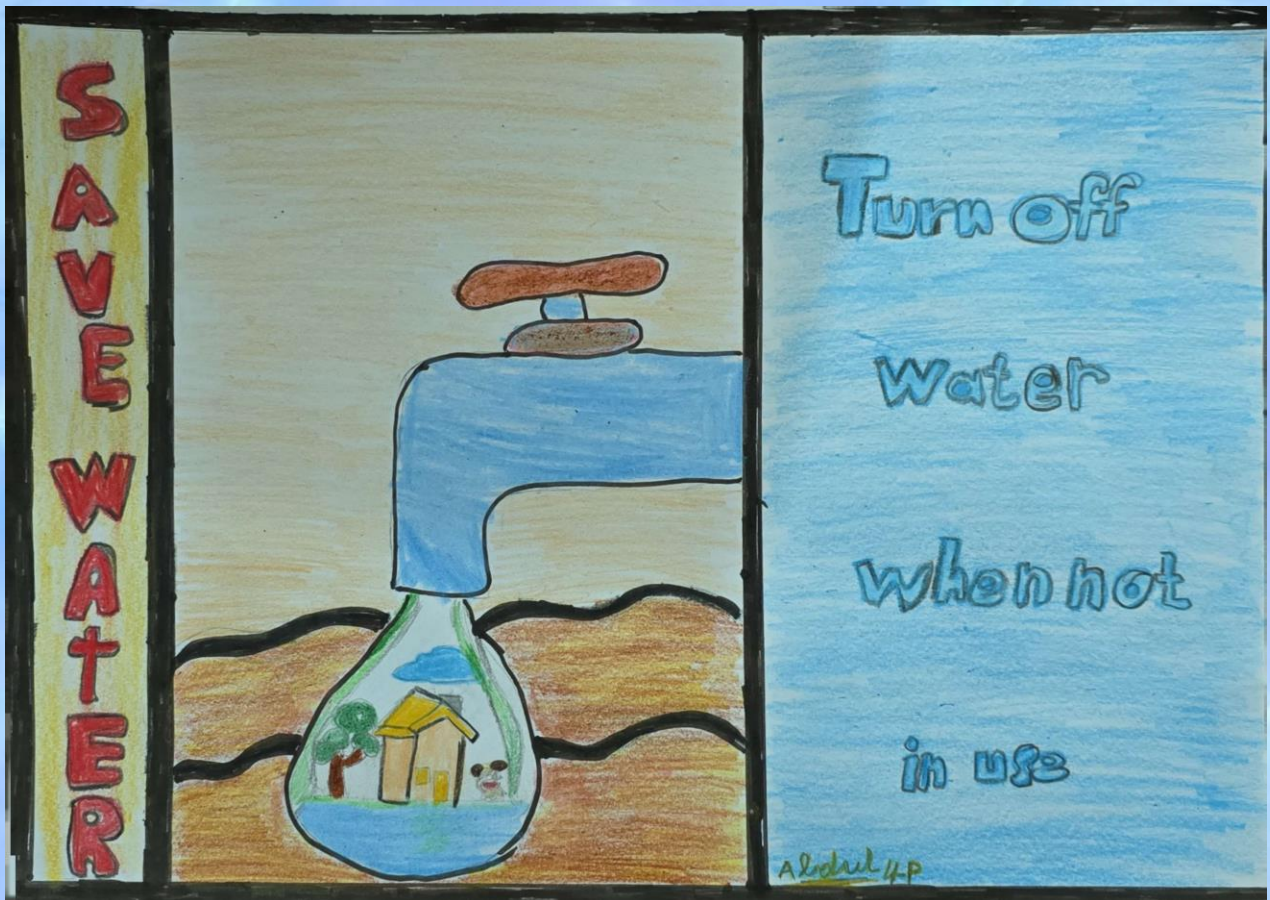

Name - Aatyushi polai

Save water / Earth

Class / Sec 4-B

Save one drop of water in current generation which saves one drop of tear in next generation.

Aehan Fazal  
Class 3D

Akashmik Mund  
Class 3F

Akshita Raj shrivastava 3-R Roll-2

Ananya-3R

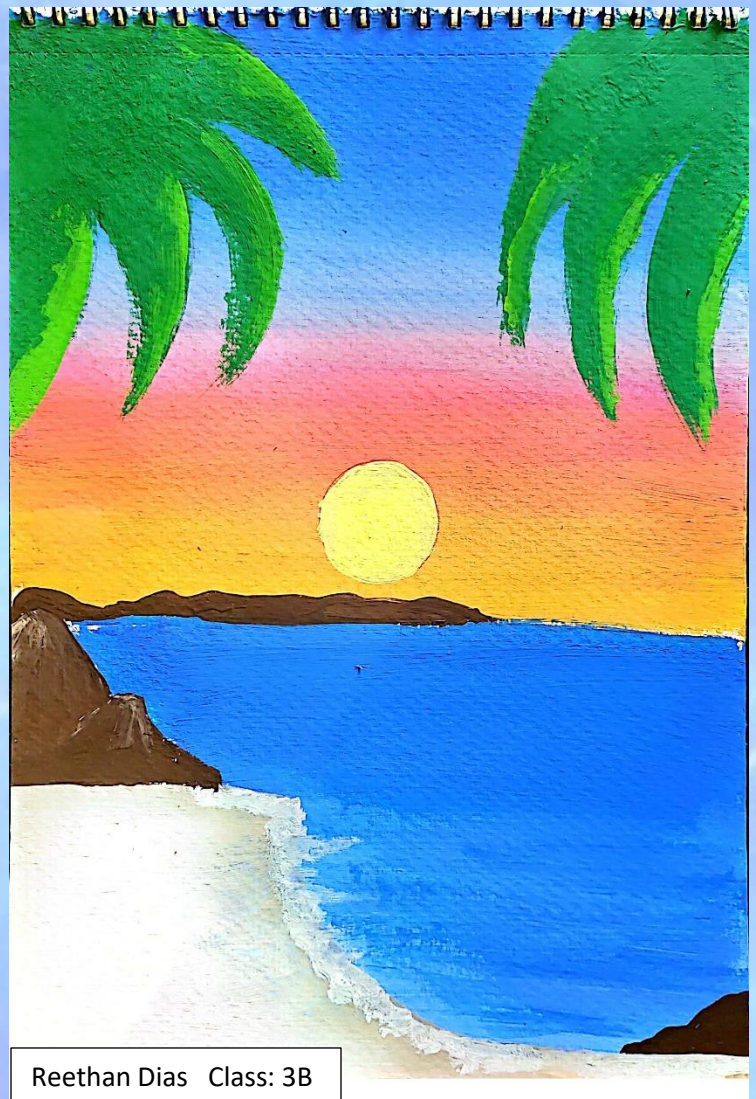

Reethan Dias Class: 3B

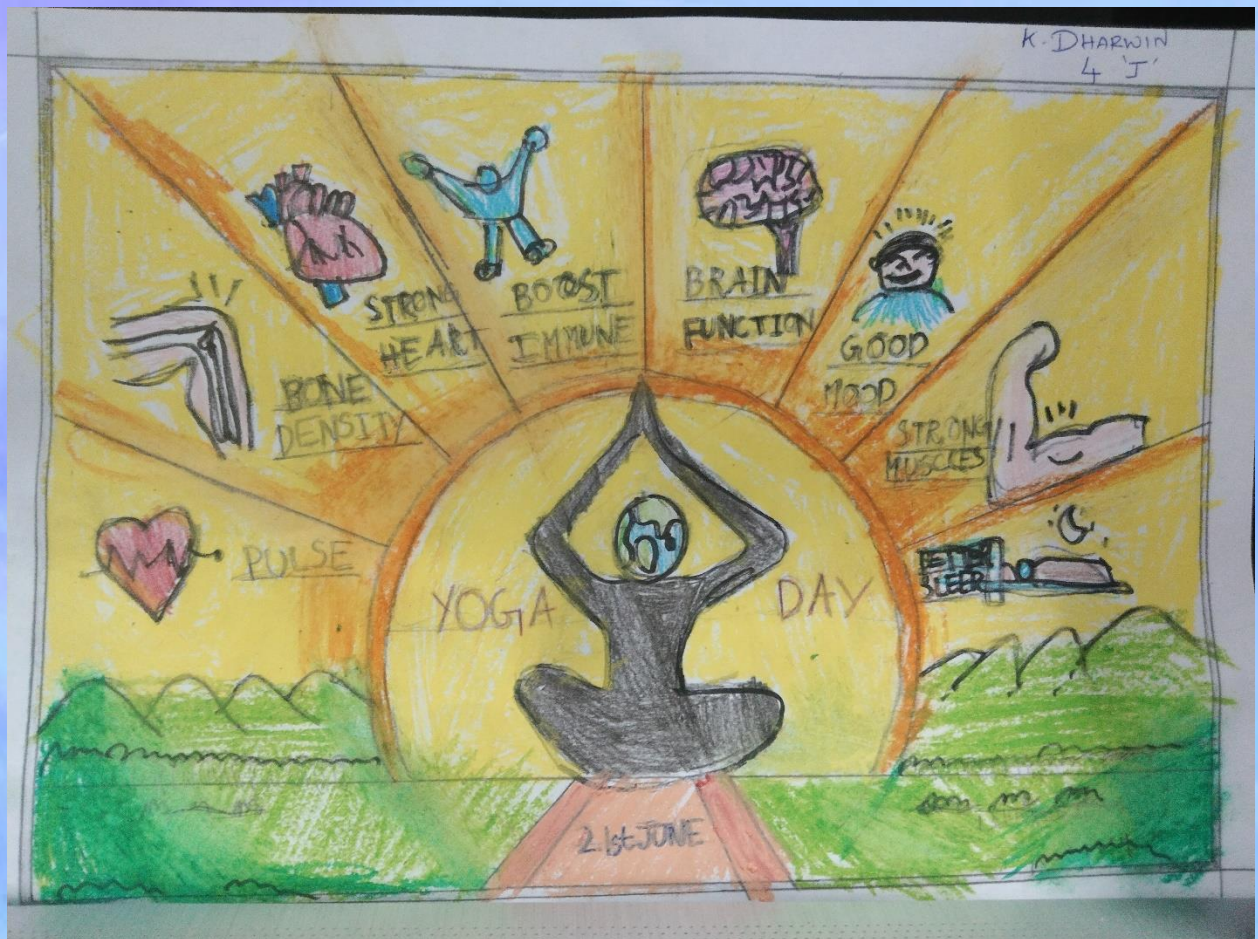

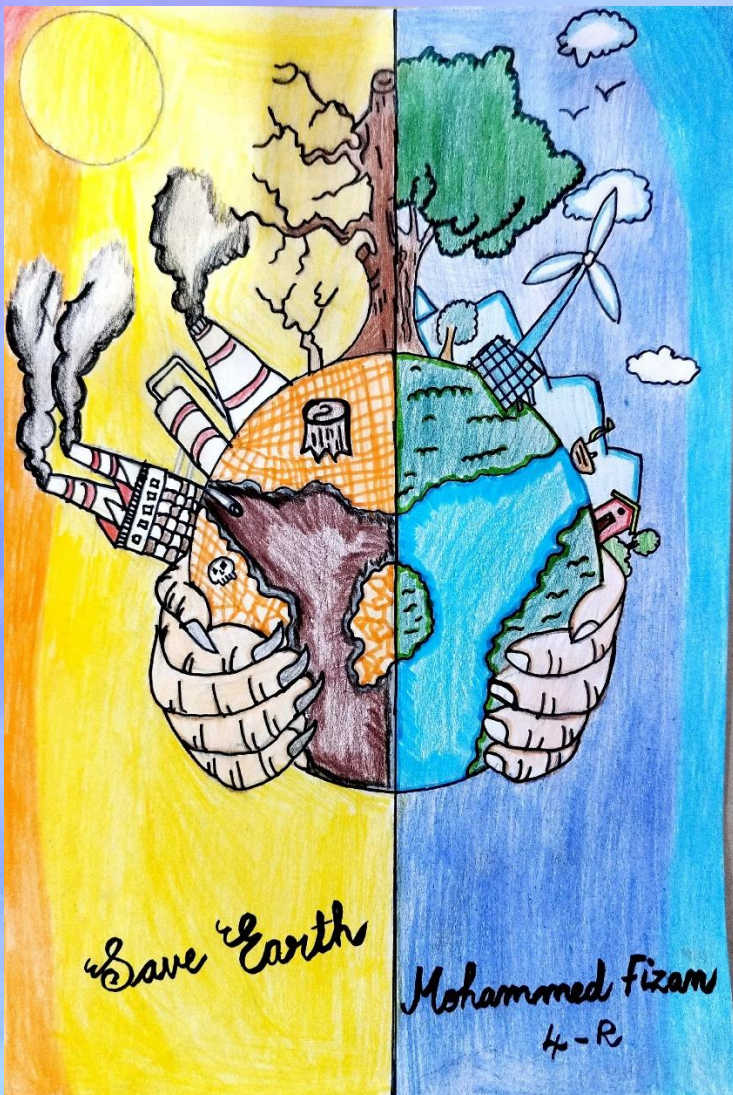

Joshua Sathya, 3-F

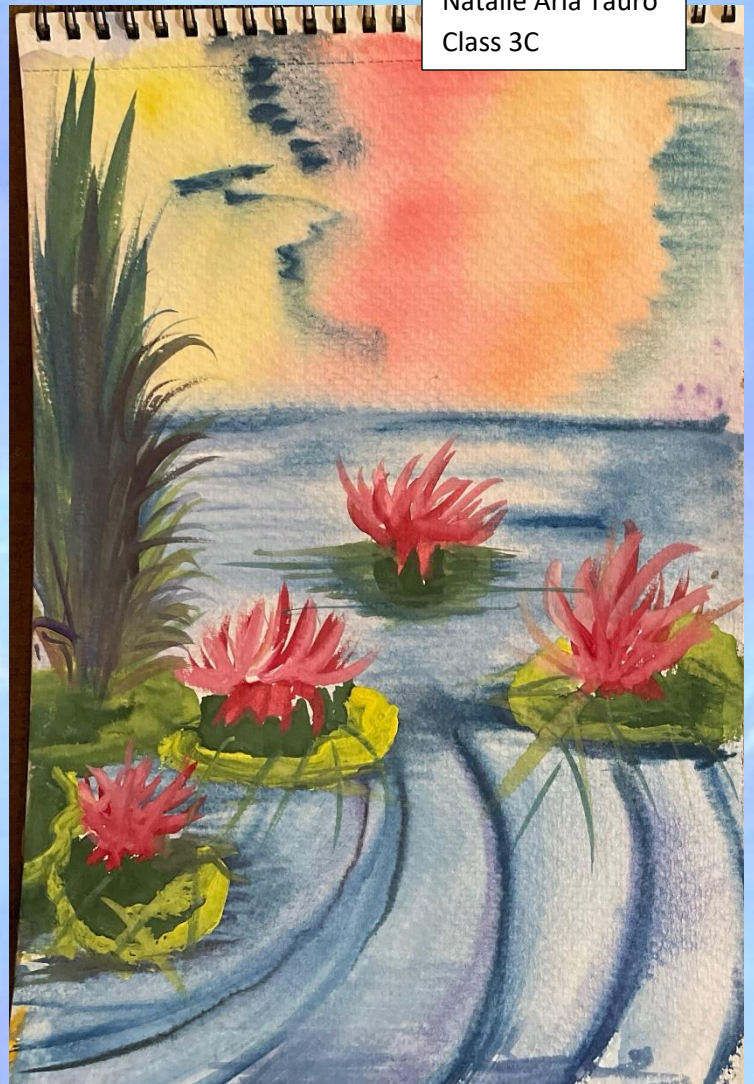

Natalie Aria Tauro  
Class 3C

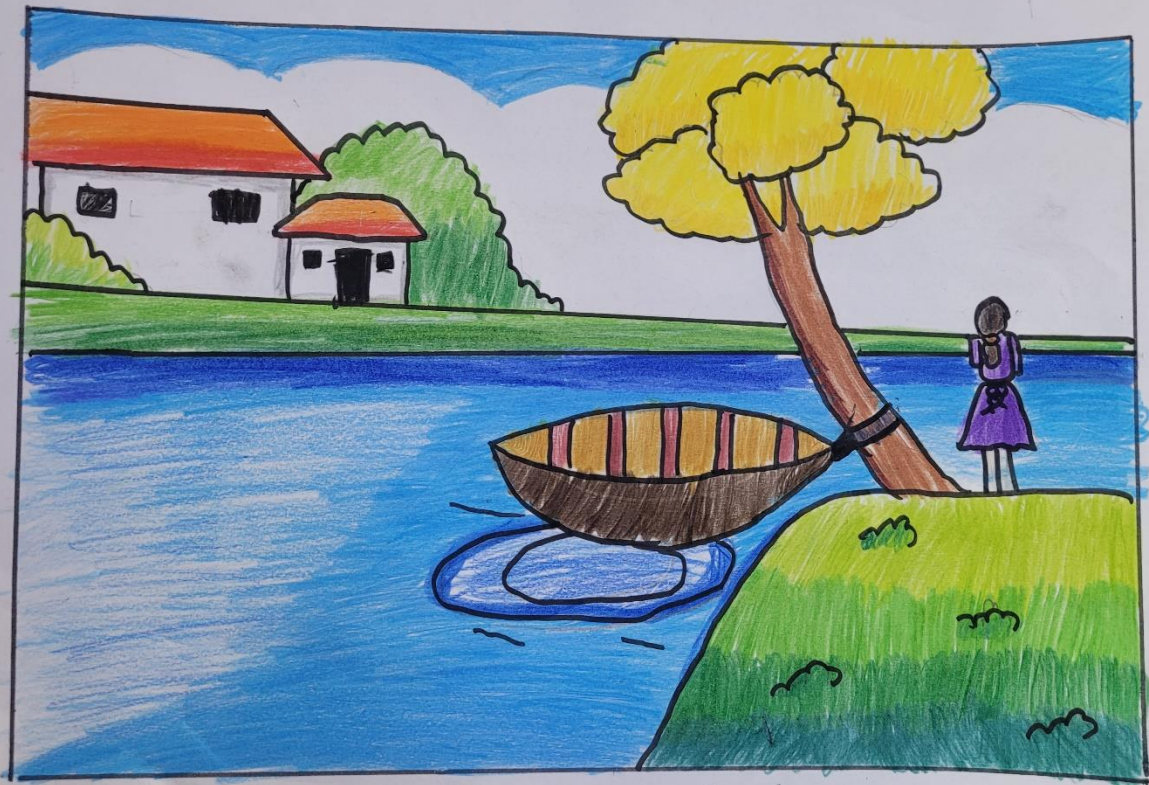

P. Selvasundaram - 3M

BUTTERFLIES IN THE GARDEN

ARTWORK - EXPRESSION

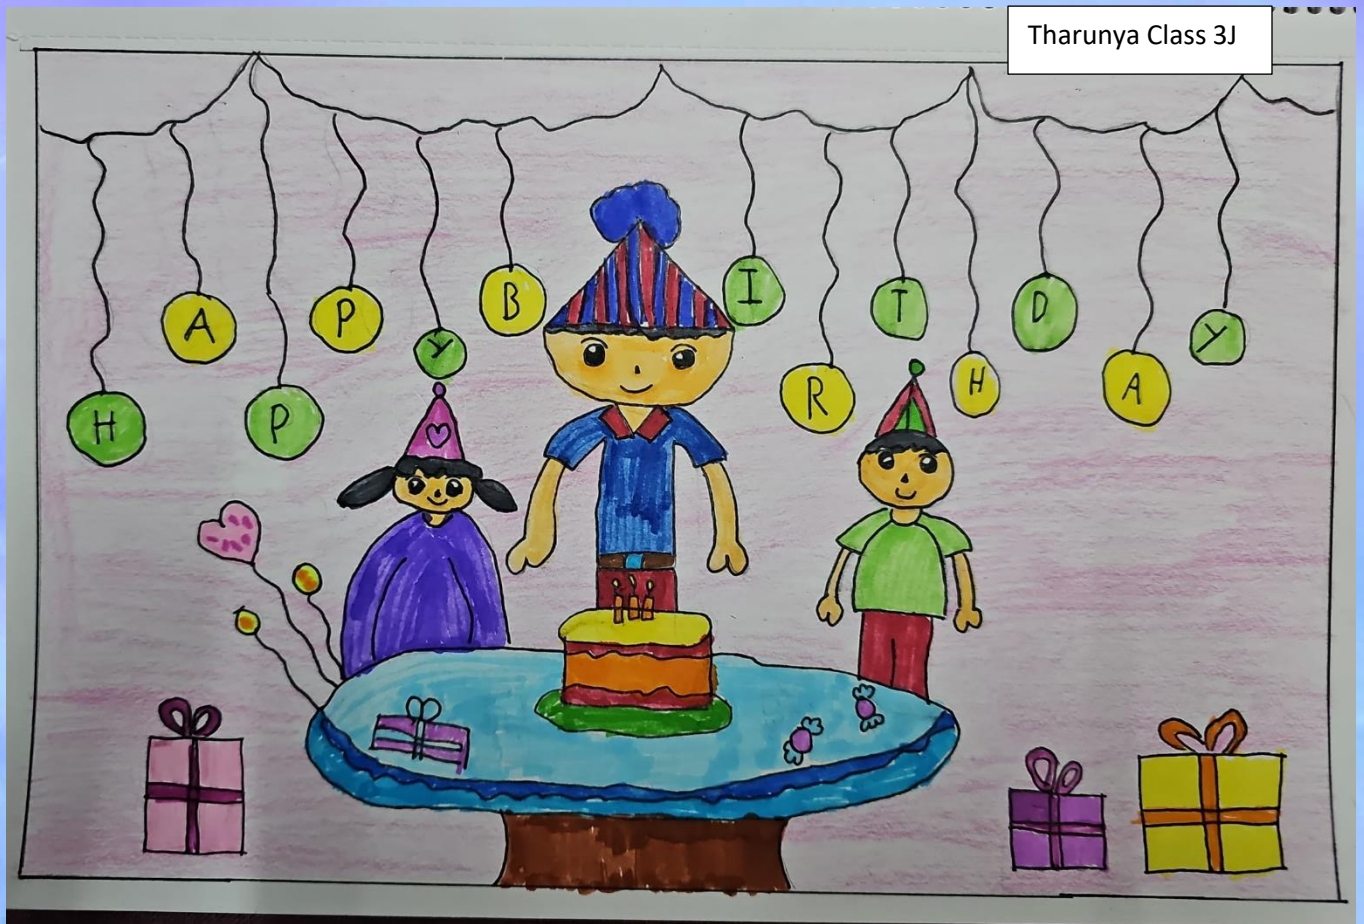

Tanvisha Gr 3-M

P. Tejaswini  
3-N

Vaigai - 4J

VARUSHKA • Jithesh

4-67

SAMRAGYEE MANDAL  
CLASS-3A
