## **A VISIT TO A FARM IN KUWAIT**

1. In winter holidays I got a chance to visit a farm in Kuwait with my family, friends and their families.
2. I was very excited to see the farm and it was very big and colourful.
3. It had lots of plants and animals.
4. I saw fields of corns, carrots, beetroots, broccoli and many more.
5. There were cows, sheep, goats, birds, ducks and swans.
6. I enjoyed touching and feeding them in the farm.
7. Me and my friends played in the play area.
8. We had a ride on a train while clapping hands and singing songs.
9. My mother bought fresh vegetables and fruits from the farm.
10. I had a great time and a lot of fun with my family and friends.

### The party

One day there was a party in the lion's house . He invited all the animals such as the cat , the dog , the bird , the cow , the wolf and the parrot .The lion asked the elephant to be the guard at that day to show the guests their tables. The lion said only the rich guests who are wearing expensive clothes can sit on the big tables which full of food and sweets . The poor guests who are wearing poor clothes sit on the floor with a little food . The fox came in a poor dress and he was given a little food and he was still hungry so he decided to leave and borrowed an expensive dress and came back again . At that time the elephant welcomed him politely and showed him the way to a very large table where all the kinds of food were there. The fox ate and at the end he took off his jacket and put on the food and said loudly " Now my jacket you can eat and enjoy your time , this party is for you ." All the guests were astonished but the fox said no one should be judged by his clothes only we are all equal whether we are rich or poor

### **My Winter Holidays**

This time my Winter Holidays were very special and unforgettable.

I visited my Uncle and aunty staying in the kingdom of Bahrain.

It's a beautiful country surrounded by beaches.

I was amazed and excited, how airplanes fly like a bird.

I visited many beaches and even an underwater aquarium.

The winter village with snowfall was a chilling experience.

I first saw fire dance with music for the first time in my life, which frightens me a bit.

We celebrated Christmas with a yummy Chocolate cake.

Time flies fast and finally, it's time to go home and I flew back to Kuwait with cherished memories.

### My Life during Lockdown...

The best place that I have ever been in my life apart from my home since my birth is my School- it is where I got my first friend, my first teacher and learnt my first game. Finishing my homework everyday was my priority. Surprisingly we were struck by Corona which totally disturbed my routine life and shattered my dreams of going back to school.

When the lockdown was announced in Kuwait, I anticipated it to be just like any other holidays that they would declare during heavy rain or storm. But I did not expect it to extend until today. Online classes made me to sit idle at home, miss my friends, teachers and the playground. Even though we stayed connected virtually, I missed the physical touch of my teachers and friends.

Thanks to the Hybrid classes, I go to school every other day. I wish, I could be in school everyday without any restrictions so that I could sit without a mask, share food with my friends and hug my teachers.

Hoping Omicron to spare at least 2022...

## POLLUTION

Pollution is very harmful for humans, animals and trees, basically for our planet earth. Humans can get sick if they breathe polluted air. Air pollution, land pollution, water pollution and noise pollution are types of pollution. Factories vehicles, airplanes, plastic cause pollution. Humans will not be able to survive with too much pollution.

To stop pollution, stop smoke factories and start electric factories. Stop use of plastic and start using paper bags. We should all take steps to stop pollution. I plan to take a net when I go to beach to pick up the plastic near shore.

**Class : 1-S**

## MY FAVOURITE ONLINE GAME/S

My favorite online games are **Math Kids-Add, Subtract, Count and Learn** and **Angry Birds**. My mother downloaded the games in her phone from the Play Store.

Math Kids is my first favourite because it helps me to learn addition, subtraction and multiplication tables. When I choose the correct answer, it turns green and if I choose the wrong answer, it turns red. Math games help me to do better in Math class. I like maths so much.

I also play Angry Birds on my mother's phone. It is about different powerful birds who try to fight some naughty pigs. My favourite birds are Bomb, Stella and Terence. Bomb is black, Stella is pink and Terence is maroon and fat.

I learnt to play these games during the lockdown in Kuwait. I play these games in my free time.

## "A Lesson I have learnt during Covid"

Covid-19, that hit our life in 2019, has taught the entire world that life is short and uncertain. Initially, as I was unaware of the seriousness of the situation, I was happy of having long holidays. But, as the time went on, realizing the damage Coronavirus made in our lives, I prayed to God every single day to remove covid from our world.

I understood the value of being in home with family and loving our loved ones and spending time with them. I started to eat healthy, keep myself neat and tidy and doing regular exercises to increase my immunity, as I was scared of Covid. I also enjoyed my hobbies like drawing and playing board games with my family and friends.

As it is said, "Cleanliness is Godliness", I feel responsible for making the world around me a better place, starting from my home. Looking back over the last 2 years, I started to value my parents, my school, my teachers and my friends more.

Though, I wish Covid did not happen to us, it taught me to be humble, to maintain cleanliness, wear mask, hand sanitization and to value the frontliners like doctors, nurses, policemen who served us selflessly, never take life for granted and enjoy every moment in life.

## WINTER BREAK

Winter vacation is a time to relax and celebrate with our family and friends. Usually, winter vacation comes right after our first term. Students often wait for the winter vacations to start as they have enough time to explore many activities.

I spent my winter vacation doing various activities such as drawing, playing keyboard, playing carrom etc. Me and my brother play chess together and have fun. My brother taught me how to play keyboard and I also spent some time studying. Especially, the time of Christmas is more fun as we get to decorate our house with many things and we also did some shopping and even sang a song for Christmas and went to church and heard the carols and it was so refreshing we also bought plum cakes and my mother even baked a chocolate cake and it was so delicious. It was so much fun.

Winter vacations are there for everyone to enjoy and cherish some wonderful memories for a lifetime.

## HELPING SOCIETY

**"We rise by helping others"**

To make this world a better place to be in, we must help each other in the society. Small efforts made by each one of us can make our society a better place to be in. We must always throw the garbage in the dustbin, so that our neighborhood is clean. We can pour the left over water from our water bottle after coming from school to the roadside trees and plants.

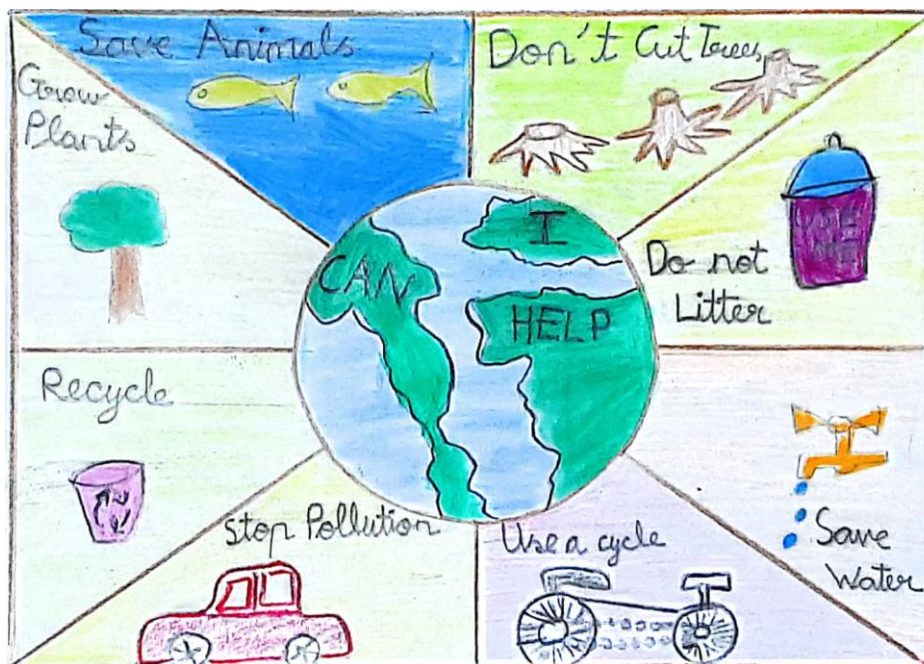

Help each other at home and school in whatever little ways we can. We can share our books, toys and clothes not in use with children whose parents cannot buy them. We will feel happy when we do these small acts of kindness. So let us be responsible and help the society. Charity begins at home.

**K.Shashwathy**

**Class 2-J**

## How to take care of our environment

The place around us is our environment. We must always keep it clean, to be happy and healthy. We must grow as many plants as possible to keep the air fresh. We must reduce using plastic items. We should throw wastes into bins. We must wipe the dust off our furniture. We should not make too much noise. If we take all these steps then our environment will be clean, green and serene.

Class 2-B

## ONLINE STUDIES

I was eagerly waiting to go to school when I took new admission in FAIPS-DPS in first grade.

But because of Covid-19 I could not go to school.

Most of the activities stopped during the pandemic but our studies didn't stop because of online classes. At the beginning it was a bit hard. And now I have learned many things from online classes. It taught me things about computer like how to login, mute or unmute, and how to turn on/off the camera.

Online studies gave me opportunity to develop new hobbies like drawing, hula hoop, and singing. I also read many story books. And we can do online studies at any place.

Yes, I experienced some disadvantages of online studies too. Like when I got net issues and got disconnected or couldn't hear properly what ma'am was teaching. Most important is I couldn't meet my friends and teachers. I even missed all the school functions like annual day, teacher's day, because of online classes. Celebrating these special days at school is fun for us.

I hope to go to Offline School soon.

**Ishika Kamble**

**Class: 2K**

## HOW TO TAKE CARE OF OUR ENVIRONMENT

Environment means anything that surrounds us. All the living and non-living things present around us form an environment. We should keep our environment clean by using different steps. We should grow plants and trees as they give us oxygen which is important for all living things. We should not pollute our environment. We can use paper bags instead of plastic bags. Do not throw garbage in the sea or ocean. We can stop using horns for no reason to avoid noise pollution. We can use solar energy as it is non-polluting energy. We can use windmill as a source of electrical energy. At the end we have to encourage each other to keep the environment clean.

**Class 2C**

## A LESSON I HAVE LEARNT DURING COVID TIMES

The Covid time was very difficult for kids of my age because we spent most of our time inside our home and missing the school, teachers and friends. It was difficult for my parents and sister also because we had to change our lifestyle.

But I learnt many good things from home during Covid time and thanks to my parents, sister and friends. I learnt to share the things at home especially laptop, TV and cycle. I learnt to take care of my sister when she was having fever.

I learnt to take care of myself like doing class work, attending online classes and eating food. I used to help my mother in cleaning the room, help during dinner and she was very happy. I also used to do cycling and exercise with my father to keep myself strong. I understood the meaning of love and sharing when people used to come and ask for help.

I prayed for everyone for their health and thanked God for taking care of me. I will continue to be a good boy helping my parents and friends.

**CLASS: 2Q**

## MY FAVOURITE ONLINE GAME

I like many online games but my favourite game is Minecraft. Minecraft is a simple and unique game. It was created by one man 'Notch' and it is his story. Minecraft game is all about your brain. In this game we can create imaginary things like trees, dirt, clouds and water. In Minecraft game everything is shaped like a block or cubes. Beware of Zombies in Minecraft as they can attack you anytime especially in dark.

This game has two main modes, Survival and Creative. In Survival mode, you can't fly and anyone can attack you. In Creative mode, you can fly and no one can attack you.

In Minecraft, we can connect with our friends online. They too can play with us. If your friends will play with you then your work will be easy. I like to play Minecraft in my free time.

Muhammad Omar Usmani

Class: 2 - I

### A lesson I have learnt during covid times

I wish 2022 will be the best year. With covid-19, life has been very sad. Because, I have not been able to go outside and play with my friends or fly in the plane to my grandparents. If there was no covid-19 in this world, there would have been no lockdowns and I could visit my favourite places without wearing masks. Even though covid-19 has come, I have chosen not to give up and instead learn something new. I started taking piano classes, music classes and chess classes, online. It has helped me not to feel bored. The whole world is changing after the covid-19 has come into this world. I have learnt that we must change too. With schools becoming hybrid, my life has become happy again.

**Class: 2N**

## Rain in Kuwait

Rain Rain Go Away  
Come Again Another Day!!!

I have grown up singing this poem all the time but how I wish the rain would never go away because I love the rainy season. Usually the rainy season starts in the month of July and August in most parts of the world but here in Kuwait the rain always brings in the Winter Season.

Here the rain starts in the month of November and December but it rains only for a few days. When it rains in Kuwait, the roads in front of my house get flooded with water....and that's what I love the most. I feel like going out...wearing gumboots and raincoat and do a splish - splash in the water... get wet in the rain... sail off paper boats... and dance in the rain with my friends. But alas!!!!... I can't... because speeding cars move on the roads of Kuwait.

However I still enjoy the rain by going out in my balcony. I stretch my hands out to catch the rain drops. I look up to the sky to watch the lightening and hear the thunder. Sometimes the loud noise of thunder makes me jump on my feet. There's a huge area in front of my house which gets filled up with water when it rains. The birds take bath there and I love to watch them flapping their wings in the water.

A few days of rain in Kuwait makes the plants and trees around me look more green and fresh. Sometimes we also get a Holiday on a Rainy Day from school.

Though the rains in Kuwait stay only for few days, I still enjoy these days at home and wish and pray that it stays for a longer time.

## BEING SAFE AT HOME

Knock Knock Knock  
Let's open the door  
No No No  
First ask "Who are you?"

Light Light Light  
Let's Light the Stove.  
No No No  
You may start a Fire!

Sharp Sharp Sharp  
Let's play with the Blade  
No No No  
You may cut your Hand

Safe Safe Safe  
Let's be safe at home.

Himesh .J

Class: 1 'N'

## Cool Cycling

Cycling is such a cool sport.

It's fun that you never get bored.

There's running, skating, swimming but I think cycling is the best of all!

It doesn't pollute the air with bad gas.

So, riding a bike makes you feel good.

We can enjoy riding through open fields, riverbanks and gardens.

The morning ride gives the day a beautiful start,

Riding with friends and family makes the evening happy.

It is fun but also exercise for the body

Cycle every day and lead a healthy life.

**Class: 1L**

### Hobbies I developed during pandemic

I waited for the day when my parents say,  
It is a holiday for your school today.  
And I heard it for many times,  
when the pandemic has hit the times.  
Though I don't realize what it is,  
I decided to make my days as good as it is.  
First, I turned to my television,  
The all-time favourite friend of mine.  
Then I got bored of that and,  
found a new friend in colours and paints.  
As I did my drawings time flew away.  
Later I saw an old piano,  
Which attracted me towards its notes,  
Which asked me to be a friend.  
When I practiced it with whole-heart  
I found a new friend too.  
So, my pandemic days were full of fun.

## ONLINE STUDYING

Online! Online! Online!

Now my school life is online!

Friends online, teacher online!

Classes online, learning online!

Far from schools but teacher's  
inches near

Screen is the board, bags without  
load!

Exams online, Results online!

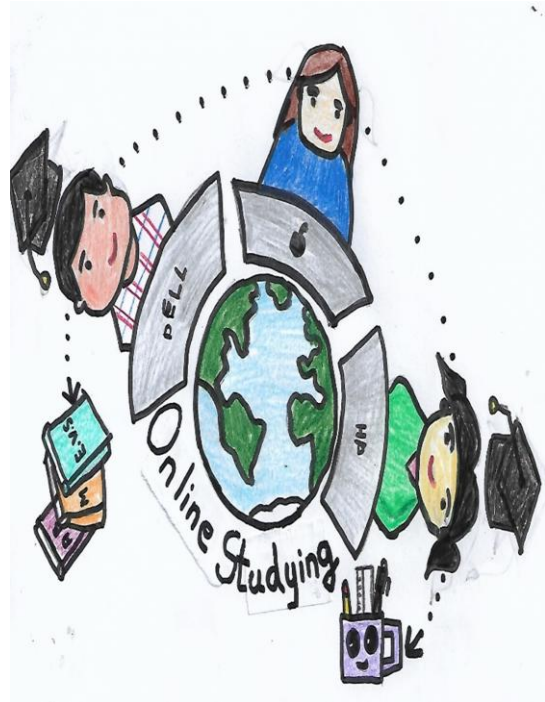

Marks online, grades too online!

Games online, hobbies online!

Prayers online, shopping online!

Online, online, online!

Oh, now my whole life is online!

Simon Jude Antony

Class 2J

## COVID WILL BE REMEMBERED

We will remember the days when the flights stayed on the ground.

When the schools closed.

When the childhood stayed indoors,

When the medical worker worked day and night,

We will remember when people fought for their lives,

We will remember when the virus left, and everything was put right,

And the schools opened and kids arrived,

Once again we are set free for a new ride.
