POEMS

OUR BELOVED TEACHERS

Teachers are like flowers,
Who are as lucky as to have four leafed clovers!
They are beautiful
And are always dutiful!

Teachers are like the sun,
Who are filled with fun!
They shine brightly,
And handle every child politely.

Today I am on cloud nine
Since, my Teacher made me shine!
Your cloud of knowledge made me proud.
Thank you for making me stand out in a crowd.

‘CHILDHOOD UNDER LOCKDOWN’

It was March 2020

I asked my mom – Why?

She told it was COVID-19

Government announced new rules

No more going to schools

No playing in the parks

No Shopping in malls

And no celebration in halls

We keep away from friends and relatives

We are locked up in house

House is full of grocery stock

And social distancing is a must

Stepping out of house, think twice

Put on our mask for protection and be wise

Clean hands at least thrice

And be kind and helpful

We will not give up hope, the end is in sight

We will all win this tough fight

The vaccine for the virus will soon be ready

Till then I will play with my barbie, mummy and daddy.

‘My school’

“Be a good friend, listen to your teachers and play”

My parents say, before dropping me to school everyday

Now school is closed, I miss this all

I hope it will reopen again this fall

I miss my teachers

I miss my friends

I miss the playground where laughter never ends

We used to play, sing, dance and learn

We used to answer our teacher’s questions turn by turn

I hope to see them all again soon

So, I can be happy like looney tunes

MY BEAUTIFUL PLANET EARTH

Dreaming of a beautiful earth,
Playing under a shining sun,
Breathing in a cool breeze,
Keeping my planet earth clean.

Planting more trees,
Making the forest green,
Conserving water,
Preserving food,
Disposing off the litter,
Keeping the beaches clean,
Switching off the lights when not in use.

Reducing, recycling and reusing is my motto to keep my planet earth clean,
Pledging to save my mother earth,
Making it a better place for you and me to live in.

MOM, I REALLY MISS YOU...

Corona Virus , Corona Virus,
Please leave us alone.
Because of you I miss my mom.
Once, If I get you in my hands
I shall turn you to a snail.

Corona Virus, Corona Virus
Please go out of this world
And especially, Please go out of
our Motherland,

Because of you I can neither,
Hug nor kiss my mom.
If you were not there,
We could live happily.

Before our God cast a
Spell on you,
Please Go away,
And never come back.

If I were you and You were me,
And If I would do the same thing,
What would you do, How would you feel,
Then you'll have the same feeling that you're giving me.

Our life has a lot of problems,
And you're making it so big,
That we can't hold it and
I am sure you will go fast.

MY LAPTOP

My new friend, my laptop
During this time of pandemic,
When I am cooped up inside my house,
Oh! My buddy, my laptop comes to my respite
My schools are closed and classes are online
My laptop brought the shrunken world to my doorstep
My laptop cracked the problematic remote learning
My laptop kept my homework in its shelves.
It increased my knowledge many-folds
And kept me full in the e-world
My buddy, my laptop became a treasure island of information
My comrade, my laptop became a source of entertainment
During the dull hours of loneliness
It connected me with my friends and family.
My pal, my laptop, I admit your worth to me.
You are my true friend indeed.

Rome Wasn't Built In A Day

Rome wasn't built in a day,
Rome was built in a certain way.
With bricks and stone, and cement and bone,
And all of this happened while the sun shone.
Now the Romans never knew the future, did they?
They didn't know the future our way.
So don't judge the Romans,
Because they didn't build Rome in a day,
They just built it in their own way.

My Dream of Environment...

*Environment is beautiful...
Troubling it is harmful...
To get healthy air
Protect the trees with care...
Nature is gold
Gather and hold...
If we save it in this situation
It will help our
future generation...*

'My Sweet Little Brother'

Oh! My little brother,
We are very strong together.

We've come closer because of COVID-19,
And learnt to protect each other and follow a routine.

By colouring our drawings brighter'
We have made our relationship tighter.

Having you in my life makes it lot easy,
You've taught me to laugh and be busy.

Though we fight and go out of line,
But we will stay together as we are the two sides of the same coin.

Sujay Karthikeyan

The background of the page is a vibrant green with a subtle floral pattern. In the bottom right corner, there is a cluster of white flowers with green leaves, and a large, stylized white flower is positioned in the bottom left corner. The overall aesthetic is fresh and natural.

Stories

'Reading'

My favourite hobby is reading. I love reading story books, comics, magazines and interesting space related books.

Reading is important because it develops our mind and gives us more knowledge about many things in life. It helps us to understand the world around us better. It keeps our mind active and increases our creative ability.

When I feel bored and lonely, books are my best friends. Good books always guide us towards the right path in life. When I read books, especially some fantasy books I feel like I'm in an imaginary world. Reading makes a person happy.

Hence, I feel everyone should develop a reading habit.

‘The Best Gift I’ve Ever Got’

The most priceless and mind-blowing gift that I’ve ever got from my parents is Tablet PC. I am grateful to them for this thoughtful gift.

I know, a lot of people say that mobile and tablets ruin the childhood. But the fast-changing world has made me realize that these days learning and getting close to each other is also possible electronically.

Corona has changed many things and one of them is schooling. With the help of my new tablet I can attend my classes online, coordinate with friends by having long chats and do many other activities. It has given me a different confidence and challenges me to learn something new every day.

My grandparents and uncle were surprised when I called them from my tablet. I also attended my cousin’s birthday celebration through my tablet and had an amazing experience.

I am going to use it wisely.

MY VACATION 2020

This holiday season I celebrated with my family in our homeland, Kerala. Due to corona I was stuck at home for six months. As I was not able to go back to Kuwait, I tried to make best out of the situation.

I get to know more about my neighbours, relatives and family. Corona taught me the importance of hygiene in our daily life. I have learned value of discipline in my life. I explored so many new indoor games. I did gardening and planted new vegetables. Even though it's scary Corona era, it has added a wonderful experience to my life.

My village is very beautiful the coconut trees and the flowerbeds in the alley are breathtaking. During rainy season it's fun to watch rain pouring down. Most of the time I had spent with my grandpa. He has shared many stories and life experiences with me. I also enjoyed playtime with my cousins and new friends. I have completely enjoyed my vacation. Next vacation also I would like to go to my homeland.

My passion for Cars

When I was one and a half years old my parents got me a new block set. It had many colorful blocks which made me very happy. I started to make different kind of things like tall towers, houses, different vehicles like trains, airplanes, and various cars. I hadn't started talking that time, but I would make various vehicle sound, and everyone around me used to encourage me. That gave me immense happiness.

Then at the age of three, I started coloring different vehicles. I used to always make my parents draw various vehicles and I loved seeing them draw for me. I was very passionate about cars from childhood days. When I was three and a half years old, I went for my first Europe trip; I was fascinated by the different types of cars. I was amazed by the various body designs, wheels and the colors of the car. And then came the biggest surprise of my life! My dad took us to F1 racecourse which was in Circuit de Spa, Belgium. I remember I used to make a lot of F1 racecourse models with my blocks then.

At the age of four I started my new journey, with my new school. I loved going to my school everyday and the best part was my bus journey to school. Every day, I saw different types of cars and thanks to Kuwait, the roads were always full of them. I would observe every minute details of the cars. This would give me a lot of ideas. I drew cars in my free time in school too and I love showing them to my teachers. Everyone appreciates me and that gives me motivation to do better. My parents always encouraged me and they still do. Slowly, from 2 D cars, I upgraded to 3 D cars. I read various books about cars, I started watching various videos related to cars which I still do. I get a lot of ideas from them. I've also made different 3D car models with papers. I've made more than 100 cars. I try to make my cars slightly different from each other. From last one year I've also started designing my cars on MS paint.

I love talking about cars and explaining them to everyone; so, my aunty gave me an idea to create a social media page of my own. And yes, I finally have one today! It's called the "**SKYRACERS**". I am so excited about it! I've also started designing my cars for my future car games. I have a dream, someday I will make my own car game. This would help the kids to get a fair knowledge of driving sense and it would make driving more thrilling. And at the end it would also have a quick question answer round.

My dream is to become a **Hot Wheels** car designer and to work with the Hot WHEELS Company. I would want every child to get different sort of cars to play with. This would bring a lot of joy in every child's life and in return would make me very happy.

Remember "if there is a will, there is a way; Nothing is impossible". Never stop dreaming, just go for it!
