

FAIPS (DPS) shapes future entrepreneurs

FAIPS (DPS) hosted a workshop on entrepreneurial development for the commerce students of class XI on Thursday, 7th November, 2019 during school hours in the Multipurpose Hall. The workshop was in collaboration with Injaz Kuwait, a non-governmental, non-profitable organization, which aims to shape budding entrepreneurs to compete in the business world. Students were taught about the advantages of entrepreneurship and were trained to think like entrepreneurs. The students were divided into five groups, in which they were expected to present a start-up plan within a span of one hour. Guided by Mr. Abdullah, facilitator and his team, the students managed to put up creative, effective and rewarding plans, of which the best was awarded. The workshop taught the students out-of-the-box thinking and effective team work.

The Principal, Mr. Ravi Ayanoli thanked the organisers for their efforts in conducting a comprehensive and informative workshop and presented a memento to the group. The students of FAIPS (DPS) were enthralled by the memorable experience, which provided a fun way to learn and grow.
