

Inter House Math Quiz Competition-FAIPS DPS

Math quizzes can be engaging, interactive and fun. This was clearly reflected in the grade III Inter House Math Quiz Competition held on 9th October 2019. The principal of the school, Mr Ravi Ayanoli graced the function.

The quiz began with the introduction of the participants from each house. The general, logical reasoning, visual, identification and rapid fire rounds tested the thinking and application capability of every contestant. The rapid fire round showcased the excellent mathematical skills of the participants.

The Hope House with its sharp and quick reasoning skills bagged the first position. The Peace House secured the second position. The third position was claimed by the Truth House and the fourth position by the Faith House. The Trust and Harmony Houses got certificates for participation.

FAIPS DPS has always believed in the overall development of children by engaging them in different activities which stimulate their critical thinking ability.

The Inter House Math Quiz Competition provided the participants a platform to sharpen their passion for Math through an enjoyable and brainstorming session.
